

Even in a high-tech environment, tried and tested communication tools are still very valuable. Your fax communications are such a resource, providing an essential link between partners, vendors and clients. With Infonet's IP Fax service you can seamlessly integrate fax and email without the need to maintain a separate fax infrastructure or to change your current email environment.

MESSAGING / WEB HOSTING

Infonet's IP FAX enables you to:

- » Send faxes directly from your PC using any email application without interrupting productivity
- » Automatically receive confirmations via email after each transmission
- » Send multiple attachments from different applications

COST-EFFECTIVE FAX SOLUTIONS FOR YOUR BUSINESS

Infonet's IP FAX service provides you with the ability to send faxes using your existing email technology. The service works with any email program and is as easy to use as sending an email. For successful multinational corporations, IP FAX enables you to handle faxes with more flexibility, reliability, security and cost-effectiveness than with a separate fax service.

Infonet's IP Fax Service is designed to offer companies an easy-to-use alternative to in-house faxing. Based on an IP network, rather than costly PSTN connections, users can cost-effectively enable their current email systems to send fax messages as easily as standard text messages.

Infonet's IP Fax Service utilises the power of the Internet to enable clients to send fax messages anytime and anywhere in the world using standard mail-client software. The mail-to-fax functionality provides plain text faxing, multi-application attachment faxing, the use of logos and coversheets and the ability to broadcast faxes.

INFONET'S IP FAX ENABLES YOU TO:

- » Send faxes directly from your PC using any email application without interrupting productivity
- » Automatically receive confirmations via email after each transmission
- » Send multiple attachments from different applications

ADDITIONAL FEATURES AND BENEFITS FOR IP FAX:

» Increased Productivity

- Unsuccessful transmissions are re-attempted automatically
- Users can send faxes via their PCs and the Internet remotely or while travelling
- Provides detailed confirmation reports
- Eliminates the need to print and copy outgoing faxes, saving valuable time
- Instantly transmits faxes

» Cost Savings

- Saves on long distance charges
- No additional charges for failed transmissions
- Requires no additional software
- Works with existing email address and Internet connections

Infonet's IP FAX provides your business with a secure, productive way to send faxes using your current email environment. The IP FAX requires no additional hardware within your existing email infrastructure, no upfront investment and requires no changes to your current work space. This seamless integration of fax and email provides your business with the industry's most flexible fax solution.

For more information about IP FAX or any other Infonet networking solutions, contact your local Infonet Services Representative or visit us at www.infonet.com.

ABOUT INFONET

Infonet Services Corporation, known for its quality of service, is a leading provider of value-added global communications services to over 2,600 multinational clients.

Employing a unique consultative approach, Infonet offers integrated solutions optimising the complex relationship between enterprise applications and the global network. Extensive project management capabilities are the foundation for the services and solution offerings (broadband, Internet, intranet, multimedia, remote and local access, provisioning, application and consulting services) positioning Infonet as the ideal single-source partner for multinationals.

Rated "Best in Class" overall in Telemark's survey of Global Managed Data Network Services, Infonet has also won "Best Customer Care" and "Best Carrier" at the World Communication Awards. Infonet owns and operates The World Network®, accessible from more than 180 countries, and provides local service support in over 70 countries and territories.

Founded in 1970, Infonet's stock is traded on the New York and Frankfurt Stock Exchanges under the symbol IN. Additional information about the company is available at www.infonet.com.
